Portfolio : Devi Deekshitha | Portfolio

CAREER OBJECTIVE

Aspiring Software Engineer with a strong foundation in full-stack development and AI-driven solutions, supported by hands-on experience in developing practical and user-focused applications. Aims to contribute to real-world software development projects while building strong professional expertise.

EDUCATION

B.E. in Computer Science & Design | 2027

ATME College of Engineering (Currently in 4th Year)

Percentage: **82 %**

Class XII / PU (PCMB) | 2023

Government PU College

Percentage: **79 %**

Class X (CBSE) | 2020

Akshara International Public School

Percentage: **77 %**

INTERNSHIPS & PROJECTS

Full Stack Web Development Intern | 03/2026 – 04/2026

Future Interns

- Engineered responsive websites using React.js and Node.js.

AURA-Health AI | Healthcare Prediction Platform | 2026

- Developed an AI-based healthcare prediction platform using multiple machine learning models with Particle Swarm Optimization (PSO) for model optimization and SHAP Explainable AI for interpretable predictions.
- Integrated a React.js frontend with FastAPI/Node.js backend through REST APIs to deliver prediction results through an interactive interface.
- Designed explainable prediction outputs to make model results easier to understand for users.

Skill Hub | Peer-to-Peer Skill Exchange Platform | 2025

- Developed a full-stack peer-to-peer skill exchange platform using React.js and Django REST Framework to facilitate knowledge and skill sharing.
- Integrated the React.js frontend with Django REST APIs and JWT authentication to provide secure user access and seamless platform interactions.
- Designed the platform to support efficient skill discovery and peer-to-peer knowledge exchange through a structured and user-friendly interface.

Browser Extension Analyzer | Security Analysis Tool | 2025

- Developed a browser security analysis tool using JavaScript and Browser APIs to examine browser extension permissions and identify potentially risky access.
- Implemented permission analysis to assess extension capabilities and highlight security-related concerns for users.
- Designed the tool to provide a clear overview of extension permissions, helping users make informed decisions about browser extensions.

ACHIEVEMENTS & EXTRACURRICULAR

- Hackathon Champion:**
1st Place –NOSTRADAMUS-2K26 Hackathon, RIMS (2026); built real-time AI prototype in 24-hr sprint against 45+ teams.
- Second-Place :** INFINITY-2K26 Ideathon, Jain University (2026) for innovative system architecture out of 60+ entries.
- Technical Events:** MRIOTHON 2.0 (2025), IEEE TECHNOVATE 2K25 (2025), and ELECTRO QUEST (2025).
- Leadership & Collaboration:** Technical Coordinator & Team Lead;

SOFT SKILLS

- Collaboration:** Partnered in teams with different domains
- Communication:** Articulated system design & presented 5+ project demos
- Adaptability:** Quickly learned modern software frameworks
- Time Management:** Delivered 100% of project goals on schedule

KEY SKILLS

- Programming:** C, Python, Java
- Frontend:** React.js, HTML5, CSS3, Responsive Design
- Backend:** Node.js, FastAPI , Django REST
- Databases:** MySQL
- Tools & DevOps:** Git, GitHub, CI/CD, VS Code, Postman, Figma
- Core Concepts:** DSA, OOP, DBMS, SDLC,

CERTIFICATIONS

- Modern JS Fundamentals
- Advanced Computer Networks (Elite Gold) – VTU (2025)
- Cloud Computing (Elite Gold) – VTU (2026)
- Natural Language Processing (Elite Gold) – VTU (2026)

LANGUAGES

- English
- Kannada
